3493** Genisys Scope Module with InfoTech Software Kit																	1, 2, 3, 4	
3780 Performance Gas Analyzer																		1, 2, 3, 4

IMPORTANT NOTES: * Pathfinder 2004 requires 256 MB for all features.
 ** Requires 256 MB minimum memory to load; 512 MB is recommended.

How to read this chart

1. Identify the year of the Pathfinder software installed in your Genisys (2001, 2002, etc.).
2. Refer to the key, and determine which number corresponds with the year of your Pathfinder software (2001=1, etc.).
3. Move across the top of the chart to find the option you want to add to your Genisys.
4. Follow that column down to the cell that lists the number for your Pathfinder software.
5. Follow that row to the left of the chart to determine what part number(s) to order.

Note: The number of your Pathfinder software may be listed more than once in a column. This means you need to order more than one item in order to use the option you want.

For example:

You own a Genisys unit with Pathfinder 2001 (symbol number 1) installed. You want to buy the InfoTech Component Database Software, which is listed in the second column in the chart. Move down that column, and you will see that the number 1 is listed twice, so you need to order Nos. 3421-50 and 3421-51.

Key:	
Pathfinder 2001	1
Pathfinder 2002	2
Pathfinder 2003	3
Pathfinder 2004	4
